

This is in reference of inhumane conditions the airlines treat all animals in transport in Docket number FAA-2002-13378.

Cargo holds should be equipped with temperature control. Airlines need to be held responsible for pets that are lost, injured, or killed. This system should be separate from lost baggage claim reports. They are living beings not baggage.

We, 4 PETS SAKE, INC. agrees with the ASPCA that the Federal Aviation Administration issue regulations to make air travel safer for animals. The proposed regulations that ASPCA has submitted should be adopted.
